FIXED FRAME SCREENS

Multi Format Imager

The Multi Format Imager is a fixed frame masking system that features variable horizontal masking. With the masking retracted, the screen is Cinemascope (2.35:1) aspect ratio. With masking, you can achieve Letterbox (1.85:1), HDTV (1.78:1) and NTSC Video (1.33:1) formats. Da-Lite's Multi Format Imager is standard with Pro-Trim finish, which is a fabric frame covering that aesthetically enhances the appearance of the installation while absorbing light that surrounds the viewing area.

Pair the Multi Format Imager with Da-Lite's Cinema Contour, Da-Snap or Imager fixed frame projection screens that are available in 13 fabric choices in either front or rear projection styles. Combined with the Multi Format Imager masking system, you can specify a Da-Lite home theater projection screen that's the perfect Da-Lite home theater solution and give your customers the format choices they desire.
