IDEA Screen

PATENT PENDING

The Interactive Dry Erase Application (IDEA) Screen is a revolutionary dual-purpose projection screen and writable marker board combination. Ideal for use with interactive short throw projectors, the IDEA Screen is designed to be wall mounted and will integrate seamlessly into any classroom, training room or meeting space where both a projection screen and dry-erase surface are required. The proprietary Da-Lite projection surface allows the projector to produce superior image quality while still maintaining the form and functionality of a marker board. A convenient tray is included at the base of the assembly for storage of dry-erase markers, erasers and interactive tools that can be used with a projector. The IDEA Screen is available in projectable sizes between 36″ and 46″ tall and has an extruded aluminum frame with either a black anodized or clear anodized finish.
